

Deterministic Approaches

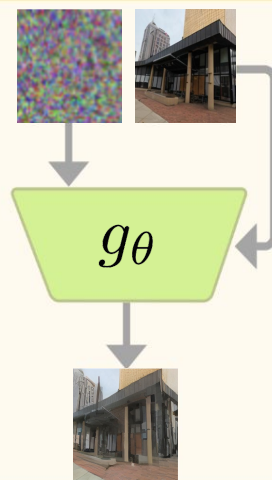

Do not handle disocclusions

Disentangled Drift and Diffusion

Performs targeted generation in regions of uncertain drift predictions

Diffusion Approaches

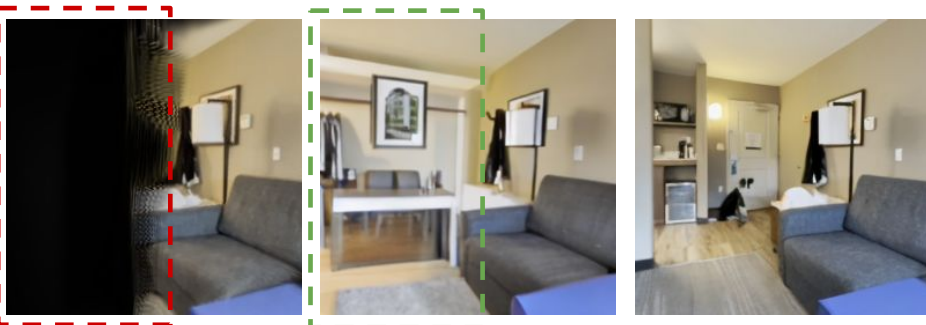

Can hallucinate and distort geometry

Diverse Action Spaces

Long-Horizon NVS Extrapolation

Action: *Camera Movement*

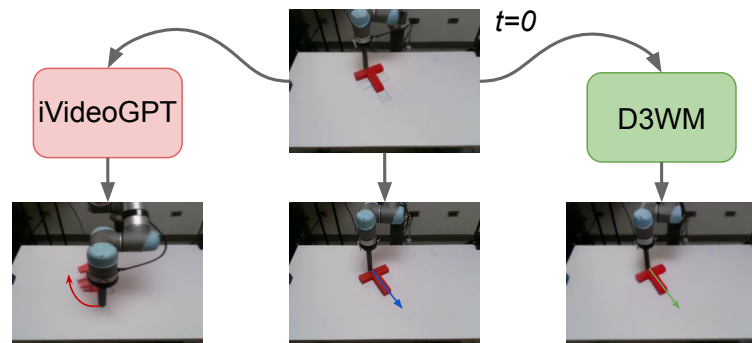

3DGS (DepthSplat) Prediction

D3WM Prediction

Ground Truth

Robotic Manipulation Trajectories from Predicted Images

Action: *Gripper Movement (PushT)*

iVideoGPT Prediction $t=16$

Ground Truth $t=16$

D3WM Prediction $t=16$

D3WM architecture overcoming “black holes” in Long-Horizon NVS Extrapolation and providing physically consistent predictions for planning Robotic Manipulation Trajectories.
